Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed that there are no commercial premises currently involved and there is no public health risk due to this virus.
- 1 AmeriCorps San Diego Spanish language interpreter responded to conduct surveillance (education/outreach), with a two week rotation.
- California Volunteers, local voluntary organizations active in disasters (VOAD), and faith-based organizations continue to assist the Agency Representative (AREP) in locating Spanish language interpreters.
- The USDA National Incident Management Team (IMT) arrived on 06/01/18 and teamed up with CDFA personnel at the CDFA Ontario District Office.
- The Cal OES AREP connected San Bernardino County Solid Waste Management Public Works with USDA contracting services to discuss an agreement for the use of San Bernardino county landfill for the disposal of backyard dead birds. SWMPW has prepared a draft board agenda item to allow them to accept the waste pending receipt of the USDAs Agreement.
- The Cal OES AREP is discussing with CalEPA the California requirements for use and transportation of certain hazardous materials.

Activations

- San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- 1 Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an operational period of 0700-1900 hours.
- 1 Cal OES Logistics Section Chief (Log Chief) deployed to the CDFA/USDA ICP with an operational period of 0700-1900 hours.

Logistics

Per the Cal OES Southern Region AREP on [06/05/18 at 0855 hours](#):

- Cal OES Southern Region along with Cal OES Logistics continue to assist CDFA in identifying a facility to expand operations in the immediate area of the CDFA district office in Ontario, San Bernardino County.
 - The IC and IMT Logistics Chief are very interested in pursuing the Ontario International Airport.
 - The AREP will follow-up with the airport via the City emergency management.
 - The Logistics Inspection Team inspected a facility in Chino on 06/04/18 and it appears to be acceptable.
 - Preliminary negotiations are being discussed.

FIRE ACTIVITY

Cal OES Fire Preparedness Levels		
National	Northern California	Southern California
Preparedness Level 2	Preparedness Level 1	Preparedness Level 2
	Multi-Agency Coordination System MACS Mode: 1	Multi-Agency Coordination System MACS Mode: 1

Please note: The National and Regional Preparedness Levels are maintained by the National Multi-Agency Coordination (MAC) Group and are separate from Cal OES activation levels.

SOUTHERN REGION

Stone, Vegetation Fire, Los Angeles County

Location: Anthony Rd at Hierba Rd, N of Agua Dulce

Jurisdiction: Local DPA, SRA, Contract County

Start time: 1245 hours, 06/04/18

Per CAL FIRE, Cal OES Duty Officers and ICS 209 as of [06/05/18 at 0858 hours](#):

- [1,352 acres, 30% contained](#)
- [Structure threat mitigated](#)
- CAL FIRE Agency Rep assigned

Fire Management Assistance Grant (FMAG)

- At 1740 hours, 06/04/18, Cal OES via the California State Warning Center (CSWC) received an FMAG request from the incident.
 - At 1837 hours, 06/04/18, the FMAG was put on hold.

Evacuations

- [None - Mandatory evacuation order issued for residents in the area of Anthony Rd., north of Sierra Highway, Aqua Dulce has been lifted.](#)

Shelter

- [Closed at 2100 hours, 06/04/18 - Marie Kerr Park, 39700 30th St. W, Palmdale](#)

Critical Infrastructure

- Per the California Utilities Emergency Association (CUEA) the fire has not impacted powerlines in the area.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A series of weak Pacific low pressure troughs will affect the region through the weekend. The first system will be dry, but the one arriving this weekend will bring a chance of rain or showers and isolated thunderstorms to our northern and eastern areas. Temperatures will remain rather moderate until this weekend and somewhat below normal. Warmer temperatures will return early next week. The coolest days are likely to be Saturday and Sunday with the warmest inland areas around 80 Saturday. Winds today will be much lighter than those Monday, although right along the coast and through the Delta there will be some gusty afternoon W to NW winds continuing. More widespread gusty S to W winds will return Wednesday and Thursday afternoons with gusts mostly 15-20 mph, but expect gusts of 20-30 mph in and south of the Delta. Monday may see dry, gusty, NW to NE downslope winds develop behind the trough when it moves off to our east.

SOUTHERN CALIFORNIA

A trough will bring cooler, onshore flow back to the area the next few days along with breezy conditions in a few locations. The marine layer has made a reappearance and night through morning low clouds can be expected over coastal and valley areas below 3,000 feet. However, above the marine layer, the air mass is very dry. Expect minimum relative humidity (RH) readings to be a bit higher over the next few days with most areas away from the marine layer seeing minimums in the 12-15% range for 6-7 hours each day. Gusty northwest winds of 20-25 mph will occur along the central coast and these winds may increase to 30 mph Wednesday afternoon in these same areas as well as the Antelope Valley and Kern County Mountains. Temperatures will cool to below normal readings through Thursday with valley high's only in the mid 80s. A weak ridge will bring warmer weather Friday, but look for temperatures to cool back down over the weekend. Gusty winds can be expected in and near the desert this coming weekend. Long range models indicate a strong ridge over the West may produce much warmer temperatures next week.
